

Pipeline Prompts — Index

All prompts used in the nomological network extraction and harmonization pipeline, in execution order. Each file contains the exact prompt text from `misc/prompts.py`.

#	File	Pipeline Step	Models	Purpose
1	01_extract_entities.md	Extraction (Pass 1)	Gemini 2.5 Pro / GPT-5.4 Mini / Qwen 3.5-397B	Extract constructs, measurement instruments, behaviors from a paper
2	02_extract_relationships.md	Extraction (Pass 2)	Same 3 models	Extract relationships between already-extracted entities
3	03_aggregate_constructs.md	Harmonization	Gemini 2.5 Pro	Group/deduplicate construct names across papers
4	04_aggregate_measurements.md	Harmonization	Gemini 2.5 Pro	Group/deduplicate measurement instrument names across papers
5	05_aggregate_behaviors.md	Harmonization	Gemini 2.5 Pro	Group/deduplicate behavior names across papers
6	06_merge_groups.md	Harmonization (merge)	Gemini 2.5 Pro	Merge groups from different batches (hierarchical)
7	07_aggregate_relationships.md	Harmonization	Gemini 2.5 Pro	Map relationships to canonical entity names, deduplicate
8	08_characterize_entities.md	Characterization	Gemini 2.5 Flash	Generate literature-review-style definitions per entity
